Algorithms

Searching for Stocks:

```
searchForStock(search: String, availableStocks: List)

FOR int i from 0 to the length of availableStocks:
    IF name of stock at index i equals search:
        return stock at index i
    ENDIF
END

return NO_STOCK_FOUND
```

Sorting stocks based on search criteria:

```
sortStocks(availableStocks: List)

LET temp = first stock in availableStocks list
LET min = first stock in availableStocks list
LET place = 0
FOR int i from 0 to the length of availableStocks:
    FOR int j from i to the length of availableStocks:
        IF sort criteria of min < sort criteria of stock at index j
            LET place = index j
            LET min = stock at index j
        ENDIF

        temp = availableStocks[i]
        availableStocks[i] = min
        availableStocks[place] = temp

    END
END

return availableStocks
```

Relevant news articles for respective stocks:

```
getNews(stock: Stock, newsArticles: List)

LET newsList = new list
FOR int i in 0 to length of newsArticles list
    LET tags = newsArticles[i]'s list of tags
    LET relevanceCounter = 0
    FOR int j in 0 to length of stock's tag list
        IF tags contains tag from stock's tag list at index j
```

```

        relevanceCounter++
    ENDIF
END

    IF relevanceCounter >= 3
        add newsArticle[i] to newsList
    END
return newsList

```

Display Ads or Not:

```

determineAdDisplay()
IF valid_ad_page (The current page user is on has a spot to display an ad):
    IF ad_free_version = false:
        FOR all advertisements stored:
            IF user clicked "don't view this ad anymore" on this specific add
            before:
                SKIP ad
            END IF
            IF ad payment is up to date from advertiser:
                DISPLAY ad
            END loop
        END IF
    END FOR
END IF
END IF

```

Friend's List Recommendation:

```

friendsRecommendation()
IF user_contact_permissions = 1:

```

```
LET list_on_app to hold contacts

    FOR each contact:
        IF contact.number registered:
            ADD contact TO list_on_app
        END IF
    END FOR

    DISPLAY list_on_app
END IF
ELSE
    DISPLAY "Allow contact permissions to view people you know on this app too!"
END ELSE
```

Displaying Portfolio Information:

```
displayPortfolioInfo()
SET theme = green
IF beginning_day_total > end_day_total:
    SET theme = red
END IF
SET total_amount_diff = beginning_day_total - end_day_total
SET total_percent_diff = (beginning_day_total - end_day_total)/beginning_day_total
LET stock_list for stock changes
FOR each stock owned
    SET stock_theme = green
    IF beginning_day_stock > end_day_stock:
        SET stock_theme = red
    END IF
```

```

        SET stock_amount_diff = beginning_day_stock - end_day_stock

        SET stock_percent_diff = (beginning_day_stock -
        end_day_stock)/beginning_day_stock

        LET stock(theme, stock_amount_diff, stock_percent_diff,
        beginning_day_stock) (stock object)

        ADD stock TO stock_list
    END FOR
    IF stock_list.length <= 1:
        DISPLAY stock_list
    END IF
    ELSE
        DISPLAY "There are no stocks in your portfolio"
    END ELSE

```

Buying/Selling Stocks:

```

BuyStock(User, Stock ID, amount):
    WHILE amount > 0:
        ADD Stock ID to User's List of Stocks
        SUB Stock price from account balance
        SUB 1 from amount
    END WHILE

SellStock(User, StockID, amount):
    WHILE amount > 0:
        IF User's List of Stocks has remaining stocks matching StockID
            REMOVE StockID from User's List of Stocks
            ADD Stock Price to account balance
            SUB 1 from amount
        END IF
        ELSE
            DISPLAY "Number of stocks attempted to sell greater than the amount
            owned. All stocks sold"
        END ELSE
    END WHILE

```

Stock Recommendation Algorithm:

```
RecommendStock(User):  
    INITIALIZE Recommended List of Stocks  
    INITIALIZE List of Categories  
    FOR each Stock in User's Stock List:  
        DETERMINE category of stock  
        ADD 1 to category value in list of categories  
    END FOR  
    SORT List of Categories by Value (Occurrence)  
    FOR each Category in List of Categories:  
        GET Categories List of Stocks  
        SORT Category List of Stocks by shares owned  
        FOR x = 0 to 3:  
            GET Stock(x) from Category List of Stocks  
            ADD Stock to Recommended List of Stocks  
        END FOR  
    END FOR  
  
    Return Recommended List of Stocks
```
